

SURVEYOR'S CERTIFICATE

This is to certify that on April 17, 2001, I completed a survey to determine the position of Runway 2/20 at the Chadron Airport. The latitude and longitude are based on a HARN station and information obtained from the NGS website and is NAD 83(1995). I took a solar observation at the HARN station with the radio tower near Chadron as a reference point. I then turned repeated angles and measure distances with a Topcon GTS 303 Total Station to each Centerline End of Runway 2/20. I then used the latitude and longitude programs (Inverse/Forward) from the NGS website to compute latitude and longitude for Runway 2/20.

This survey was performed at the request of Eric Johnson, representing Kirkham Michael, 9110 West Dodge Rd., P.O. Box 24129, Omaha, NE 68124-0129.
